

TA6828 - Update previous mappings based on data element requirements in ICDs

Link to task in Rally: <https://rally1.rallydev.com/#/120708787896d/detail/task/192873055656?fdp=true>

All the previous mappings of the transactions have now been reviewed by the TASCore team using up to date ICD's were available from the various product teams.

The results of the review and re-working as needed are consolidated and available for review at the following link for all the transactions in scope at this time.

At the end of spint 3, brand new transactions were presented to TASCore requiring additional mapping - registration messages, table updates etc.. Those also will be mapped like the others - work beginning in sprint 4.
